Education

University of Leeds, United Kingdom   Sep 2022 - July 2024
Bachelor of Computer Science (Honours)

Taylor's University, Malaysia   Aug 2021 - July 2022
Bachelor of Computer Science (Honours)
CGPA: 4.0, Dean List All Semester

Experience

AIA Hackathon 2022
Project Manager, UI Designer
Semi-Finalist, Best Pitch Prize
- Develop an innovative solution that solve mental health challenges and build the future of insurance industry.
- Created a mobile application prototype that helps to tackle smartphone and internet addiction using Figma.
- Link: https://www.figma.com/proto/AUFOlpAJRjsafGqjMaI2yl/AIA-Hackathon?node-id=14%3A3&scaling=scale-down&page-id=0%3A1&starting-point-node-id=14%3A3

Programming Tutor   Jan 2021 - July 2021
Heriot Watt University
- Recommended by lecturer to become a programming tutor who provides guidance and supports to students who are struggling with their studies.
- Conducted revision sessions for more than 20 computer science students every Tuesday and Thursday night, resulting in 10 of them achieved the highest possible grade.
- Applied my own teaching method to solve student's difficulties in classes, enhance their coding skills and gain better understanding in programming.
- Aided frustrated and confused foreign students by solving their difficulties in multiple languagues such as Mandarin and Malay.

Project

Built and Deployed my Personal Website using ReactJS
HTML/CSS/SCSS/JavaScript/React
- Utilised React as main framework to build a detailed portfolio.
- Utilized SCSS concepts such as flexbox and grid for modern UI design.
- Link: https://yhann0827.github.io/personalwebsite/

Built a Responsive Weather Website using ReactJS
HTML/CSS/JavaScript/React/OpenWeatherAPI
- Built a responsive design for both PC and mobile version using CSS.
- Implemented OpenWeatherAPI to fetch the relevant weather data.
- Utilized React Hook to build modern and reusable components.
- Link: https://yhann0827.github.io/weathernow/

Built a Java GUI Food Ordering Application using Java
Java
- Utilised Java Swing packages to build GUI components for the system.
- Implement various concepts and classes like JFrame to build the app.
- Link: https://github.com/yhann0827/food_ordering_system

My Skills

Web Design (HTML, React, CSS, JS)

Object-Oriented Programming (Java)

C++

Backend Development (SQL, MongoDB, PHP)

Video Editing

Soft Skills (Communication, Teamwork, Leadership)
